Bonn, September 11th, 2020

Dear Jarred,

I am very excited about our joint project “Synaptic Microcircuitry during Axon Regeneration: The Role of Rehabilitation in Modulating Neuronal Tracts and Behavioural Outcomes Following Microtubule Stabilization Treatment” where we applied for funding within the SFB1089.

In case this project will be funded, the newly recruited postdoc will be First author on any resulting publications from this study. You will be the last author on any resulting publications from this study. I will be second last author and will share correspondence with you.

I am very much looking forward to this exciting endeavor.

Best regards,

Prof. Dr. Frank Bradke
